# Gas Test Atmospheres Course (1 day)

## Who should attend?

This course is suitable for anyone involved in the use of gas detector equipment; particularly individuals who are required to undertake gas testing of an atmosphere prior to entering a specific area or workspace.

## Course outcomes

This course provides the competency required for MSAPMOHS217A–Gas test atmospheres. Participants will gain the skills required to select, use and maintain electronic gas detectors.

## Course content

The following content is covered during the course:

- Definitions
- Common gases and gas detector construction
- Prepare for gas testing
- Test the atmosphere
- Gas detector maintenance

## Course delivery

The course is delivered over one day and includes both theory and practical exercises. Participants will be required to complete a short written assessment and two practical assessments.

## Course assessment

On successful completion of the course and assessments, participants will be issued with a Statement of Attainment.

## Why choose Simtars for your training?

- We have over 25 years of industry experience in mining safety.
- Our world-class facilities enable practical training and enhance learning outcomes.
- We incorporate virtual reality experiential learning into our courses.
- Our expert trainers are on hand to guide you through your course.

## Training location

This course can be delivered at our fully-equipped Safety Training Centre at Redbank or at any other suitable training facility in Queensland
