**MONGOOSE**

*Sealweld®*

# SMALL, FAST AND PRECISE...

These attributes give the Sealweld Mongoose an edge over its competition. This is the smallest frame-mounted manual injection pump in the pipeline service industry today. A breach-loading cap makes filling the barrel extremely quick and easy with packing, sealant and lubricant sticks, liquid flushes and valve cleaners. One ounce of product is dispensed for every 11 strokes of the foot pump which makes it extremely accurate when servicing smaller valves or energizing stem seals. The removable handle adapts to the foot pump bar to allow for hand operation in two positions and also locks in the breech cap handles for easy transport. An optional magnetized wheel assembly makes transporting the Mongoose easier when servicing valves in a large yard or facility. Contact a Sealweld representative for pricing and availability!

## TECHNICAL INFORMATION

### OUTPUT PRESSURE

**10,000 PSI** (69 MPA / 690 BAR)

### BARREL CAPACITY

**11.5 OZ** (340 ML)

### OVERALL WEIGHT

**39 LBS** (18 KG)

### DISCHARGE RATE

**11 STROKES/OUNCE** (30 ML)

### ACCESSORIES

**MAGNETIC CLICK-ON WHEELS**
